## SHPE Software Engineering Early Career

**OBJECTIVE:** I am a dedicated **Full-stack software developer** focused on solving real-world challenges through **MERN Stack** and **Python-based software development**.

### EDUCATION

#### CALIFORNIA STATE UNIVERSITY, LONG BEACH

Expected: May 2024

Bachelor of Science in Computer (GPA: 3.7)

**COURSEWORK:** Data Structure and Algorithms | Object Oriented Programming | Database Fundamentals | Software Engineering Fundamentals | Software Project Management and Testing | Machine Learning | **Mobile Application Development** | **Introduction to Networks and Distributed Computing**

**ORGANIZATIONS:** National Society of Collegiates and Scholars | Association for Computing Machinery

### TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript/TypeScript, C++, C#, HTML, CSS, Kotlin
- **Frontend/Backend Frameworks and Libraries:** Django, React.js, React Native, Flask, Node.js, Express.js, Jest, Bootstrap, ORMs (JPA), Tailwind CSS, SQL.
- **Software Tools & Cloud Services:** Git, AWS SaaS, Google Cloud, Insomnia, Postman, JSON, REST API,
- **DevOps:** Git version control system, Docker, GitHub CI/CD
- **Relational/Non-Relational Database:** MongoDB, MySQL, PostgreSQL, SQLite, Derby

### PROJECT EXPERIENCE

#### Beach Events App (React Native, Express JS, Django, MongoDB)

January 2023 – Present

- Engineered a **unified socialization platform for 30,000 CSULB students**, enhancing their engagement with clubs and events.
- Enhanced user experience by implementing features like Directions, Organization subscriptions, Event notifications, and Account management.
- Adopted the **full-stack developer role**, and accomplished client-server connections, **Object Relational Mapping**, Authentication, **REST API designing/debugging**, and UI Components creation.

#### Automobile Price Prediction Model (Python)

January 2023 – April 2023

- Developed a **Gradient Boosting Regression model** achieving **87% accuracy** in predicting automobile prices.
- **Processed data** sets using the **sklearn** library and **improved accuracy by 12%**
- Leveraged **scikit-learn** for **K-Fold cross-validation**.

#### Fridge Manager (Django, Django HTML, JavaScript)

January 2023 – April 2023

- Constructed a web-based fridge manager application to tackle household food management challenges.
- Empowered users to remotely access their refrigerator, track item expiry dates, and efficiently manage space, substantially saving food and financial resources.
- Utilized HTML, CSS, JavaScript, Django, and MongoDB in an agile, Scrum-focused full-stack developer role.

#### Evil Twin Attack (Python, HTML, CSS, PHP, MySQL)

September 2022 – December 2022

- Developed **automated software for Evil Twin attacks**, monitoring internet activity and extracting login information.
- Composed a **Python script** to set up a deceptive Wi-Fi network leading users to a Captive portal Programmed using **HTML** and **CSS** and connected the page to **MySQL** database using **PHP** to store the login credentials.

#### Pokémon CLI Game (Java)

October 2021 – December 2021

- Forged a **replica of the Pokémon game** by developing a distinctive console version.
- **Programmed backend functionalities** of the game for Pokémon Hunting, Player Battles, and Map Explorations.
- **Devised UML class diagrams** and implemented them by following critical concepts of **Object-Oriented Programming** and **Design Patterns**.

### WORK EXPERIENCE

#### College Of Engineering, Long Beach, CA

January 2023 – present

#### Computer Science Teaching Assistantship (Tutor)

- **Delivered** one-on-one and group **academic instructions to students** on core and upper-level computer science subjects.
- Collaboratively with students to address coding challenges and personal projects and offered knowledge related to, **Web development**, **Data Structures and Algorithms**, **Object Oriented Programming**, and **Networking**
